SCHEDULED REPORTS

Daily Reports, Tomorrow's Outlook, Severe Weather Reports, Nowcast Reports and Outlook Reports via Email and Text Message from your mobile device

LIGHTNING DETECTION ALERTS

Advisory, watch and warning alerts for Total Lightning (both in-cloud and cloud-to-ground) strikes and all-clear countdown notifications

SEVERE ALERTS

Real-time Severe Weather Reports and Dangerous Thunderstorm Alerts with classified Events and Impacts for your project using our machine learning automations

NOW CAST ALERTS

Reports as of Now, on-demand and in real-time to save for your record and share with your team members and project stakeholders

ACTUAL REPORTS

Actual weather data, real-time photos and time-lapse videos of your job site, field operations and the surrounding sky, for your historical record

OUTLOOK REPORTS

7-Day Outlook for look-ahead planning at-a-glance and Lean pull-planning with the Events and Impacts chart specific for your project schedule activities

MOBILE ENABLED

Mobile app provides immediate information at the point of project construction and site operations for team members and project stakeholders in the field and on the worksite. Schedule reports that can be texted to various stakeholders and decision-makers. Lightning and severe weather alerts keep everyone on the job site safer while weather decision automation reduces risks by ensuring safety measures are followed.

SMS & TEXT MESSAGING

Get Daily Reports, Severe Weather Reports and Lightning Detection Alerts via SMS / Text Messages to any mobile device, Apple, Android and many others

LIGHTNING DETECTION ALERTS

Advisory, watch and warning alerts for Total Lightning (both in-cloud and cloud-to-ground) strikes and all-clear countdown notifications

AUTOMATED EMAILS

Automated Email Messages to your inbox for Daily Reports, Tomorrow's Outlook, Severe Weather Reports and Summary Reports for your project

WATCH NOTIFICATIONS

Notifications of Daily Reports, Tomorrow's Outlook, Severe Weather Reports and Summary Reports for your project to your watch

PRINTABLE REPORTS

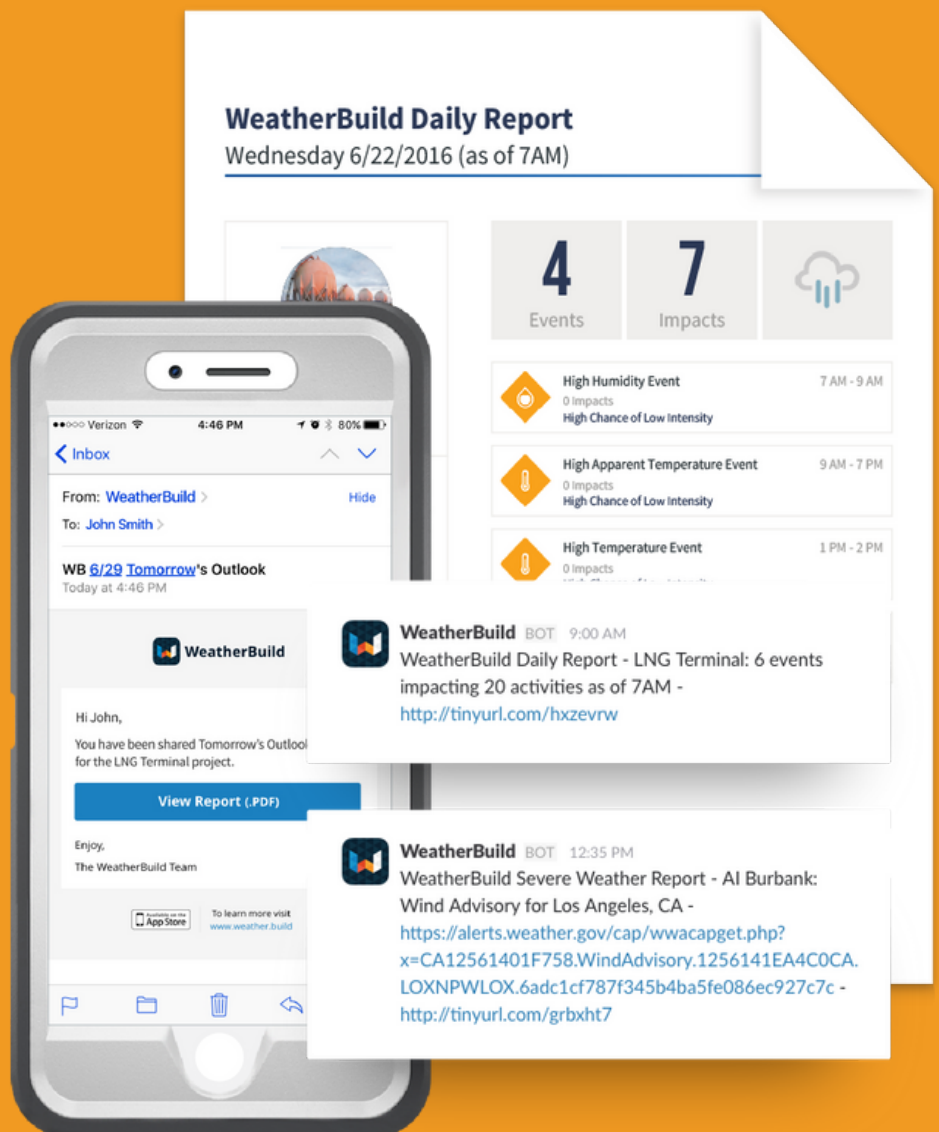

Daily Reports, Tomorrow's Outlook, Severe Weather Reports and Summary Reports with custom logos to your inbox

SLACK INTEGRATION

Notifications of Daily Reports, Tomorrow's Outlook, Severe Weather Reports and Summary Reports for your project in your custom Slack channel

NOTIFICATIONS & COMMUNICATIONS

Scheduled and real-time push notifications and text messages sent to your mobile device, and automated email messages and printable reports pushed to your inbox. You can even use Slack to communicate and share weather intelligence with teammates.

SCHEDULED REPORTS

Publish Daily Reports, Tomorrow's Outlook, Severe Weather Reports, Nowcast Reports and Outlook Reports directly to your project plans and project management software

PREDICTIVE IMPACT ANALYSIS

Advisory, watch and warning alerts for Total Lightning (both in-cloud and cloud-to-ground) strikes and all-clear countdown notifications

HISTORICAL RECORDS

Historical reports of actual weather data with event and impact analysis

OUT-OF-THE-BOX INTEGRATIONS

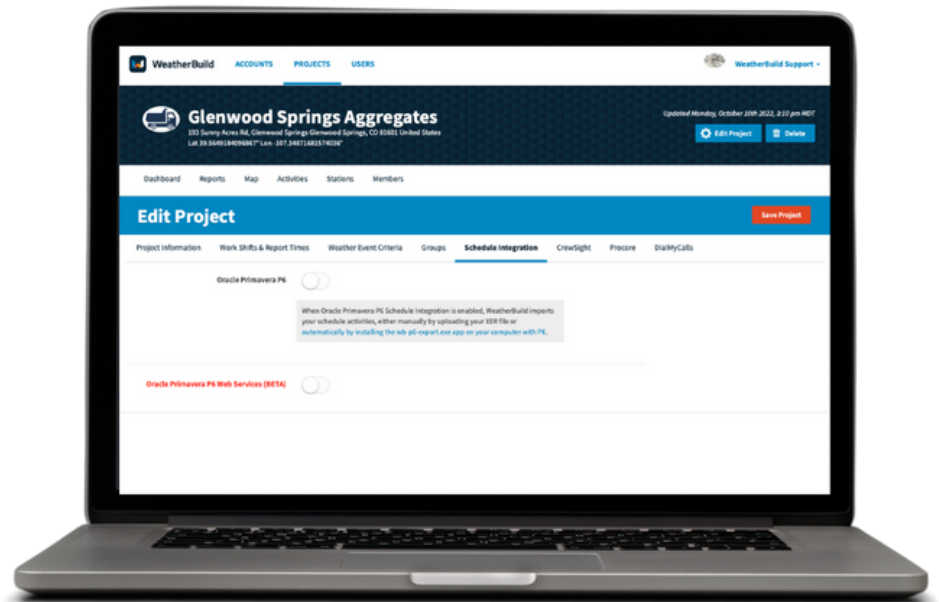

Integrations with our technology partners is quick and easy. WeatherBuild has native APIs which allow for a painless implementation that does not overwhelm IT departments

OUTLOOK REPORTS

7-Day Outlook for look-ahead planning at-a-glance and Lean pull-planning with the Events and Impacts chart specific for your project schedule activities

SCHEDULE INTEGRATIONS

Data exchange is preconfigured with Oracle Primavera Enterprise Project Portfolio Management products, Trimble products, Microsoft Excel and Project files, and many other formats. WeatherBuild also allows users to take advantage of Automated Weather Decisions, which promotes worker safety and risk mitigation.

LIGHTNING ACTIVITY AND DETECTION

Industry-leading, long-range lightning sensor technology that detects total lightning (both in-cloud and cloud-to-ground) strikes

NETWORKED STATIONS & SENSORS

WeatherBuild Stations and weather sensors for real-time data collection and transmission at or nearby your jobsite

ACTUAL WEATHER DATA

Stations and sensors on your construction site assets to measure actual weather data at your exact project location

REAL-TIME PHOTOS & TIME LAPSED VIDEO

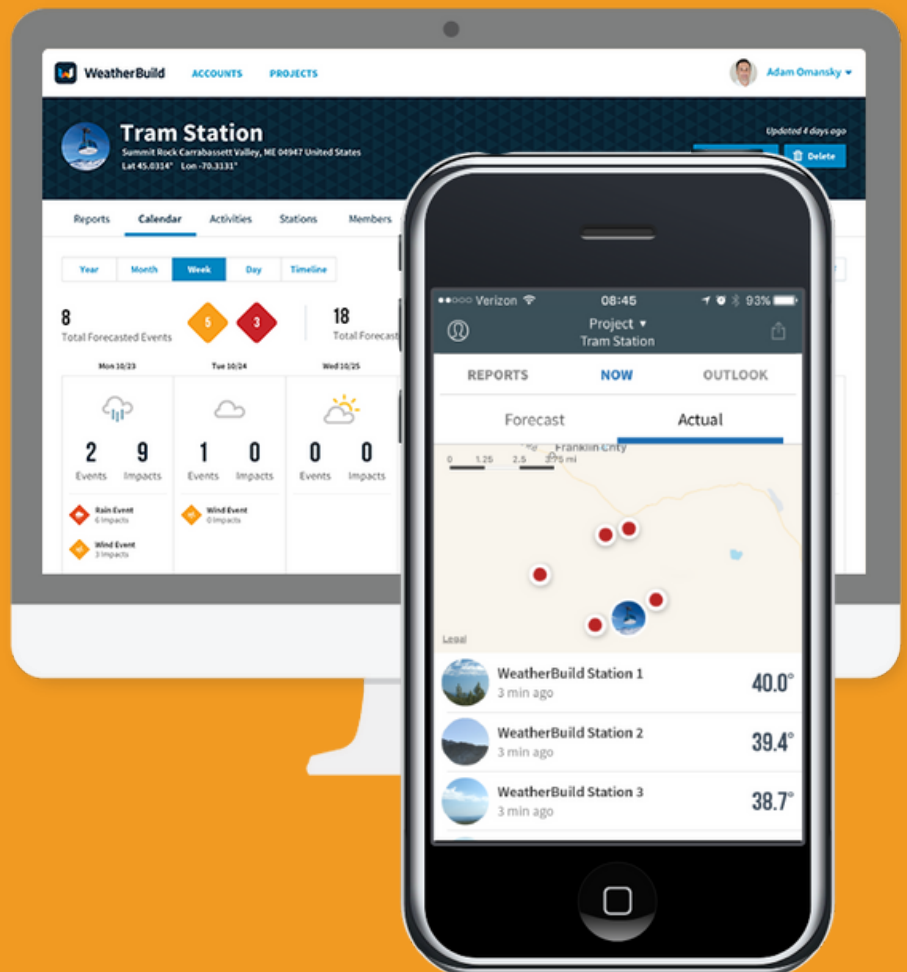

Automated capture of real-time photos and time-lapse videos of your job site, field operations and the surrounding sky

WEATHERBUILD STATION ADAPTOR

Integration with your existing weather sensors and third-party weather devices to the WeatherBuild Solutions

WEATHER STATION INTEGRATION

Wireless devices with high-precision sensors and high-definition cameras are available for historical records, risk management and dispute resolution. Integrate with on-site weather devices to enhance data collection and improve WeatherBuild's performance.

ABOUT WEATHERBUILD

WeatherBuild offers weather-enabled decision support solutions that empower contractors, owners, and operators to improve situational awareness and make better-informed decisions about weather events, schedule impacts, safety risks, and probable outcomes. Our mission is to leverage weather data, decision science and predictive analytics to increase productivity, enhance safety, and manage risk.

WeatherBuild is a BulkSource proprietary decision science product. BulkSource is a veteran-founded supply chain and decision science software provider for aggregate, asphalt, concrete, and other infrastructure material producers.
